Dr. Melkers is a 1994 graduate of Marquette University School of Dentistry. He practices general dentistry with an emphasis on comprehensive and restorative care. Dr. Melkers balances his time between private practice, teaching, research and publishing.

Dr. Melkers has presented and been published around the world on occlusion topics, communication and restorative dentistry applicable to the every day and some day practice.

Dr. Melkers is the founder of the Nuts & Bolts Occlusion programs and is Past Director of Occlusion & Aesthetic Dentistry at the Pacific Northwest AEGD Residency Program. Dr. Melkers is a mentor for The Pankey Institute & Visiting Faculty at The Spear Institute. Dr. Melkers enjoys sharing real world challenges as well as solutions in his interactive learning experiences.

DR. MELKERS' DOWN UNDER STUDY CLUB

Communication,
Treatment Planning
& Occlusion

October 21-23, 2012

The Woodlands

Kerikeri, New Zealand

“We arrived as colleagues-we left as friends.”

We hope that you can join us for this very special gathering in Kerikeri this October at The Woodlands Hotel & Conference Center.

The Down Under Study Club is a great group of Dentists committed to bettering themselves for better comprehensive patient care. This year we will be focusing on bridging the theoretical aspects of facially generated treatment planning with practical hands on exercises that will bring your new found skills back to your practice.

This three day event is a balance of communication, occlusion, treatment planning and fun evening social events and discussion.

You can find out additional information and register at www.MichaelMelkers.com

Dr. Simon Leith is helping organize the event once again. He can be reached via email at simon.leith@gmail.com or contacted by phone at 09 407 8338

CE YOU CAN USE!

“After hundreds of hours of courses on how to do the dentistry I want, it was refreshing to actually learn how to GET to do the dentistry I want. Make no mistake-it is all about the verbal skills”
Dr. Alan Mead

COMMUNICATION

One of the most critical keys of actually getting to do the dentistry we want and our patients need is communication- with our patients, our treatment team and our technicians.

Communication & listening skill will be woven throughout the program so that you will be able to take your skills home & put them to use.

*Retreat setting
in the North Island*

*Small group
interaction & learning*

TREATMENT PLANNING

Balancing the patients' goals with our own technical knowledge, participants will treatment plan several cases from their own practices as well as cases that Dr. Melkers will share.

Together, we will bridge from patient goals to photography to mock-ups to diagnostic models. A logical, efficient treatment planning methodology will be introduced and applied.

*Treatment planning & exploring
together*

*No challenge is too great,
if you plan ahead*

OCCCLUSION

Making smiles pretty can be quite easy. Designing them so that they last can be a challenge. With discussions of failure and hands on application of principles, we will explore occlusal concepts and force management. From ideal to the surreal, we will bring together the goals of our esthetic treatment planning with the actual 'how to get it done' & communicate that with our technicians and move forward with successful treatment.

Hands on experiential learning

*Demystifying concepts that you
can take home*
